## **CHANGE IN FORMALDEHYDE APPROVAL**

The SURVIVAIR Organic Vapor and Acid Gas air purifying cartridge P/N 100300, is no longer NIOSH approved for protection against formaldehyde. The new cartridge label has been modified by removing formaldehyde from the label.

The Acid Gas cartridge, P/N 100200, is now approved for use in atmospheres containing not more than 10 ppm of formaldehyde. The word formaldehyde has been added to the label on this cartridge.

These cartridges must be checked to ensure that you are using the correct one. Check the labels for the new wording prior to use. All other conditions of approval remain the same for both cartridges.

**P/N 100300**  
**No longer approved for**  
**FORMALDEHYDE**

**P/N 100200**  
**No longer approved for**  
**FORMALDEHYDE**

Old 100300 cartridges labeled for 30 ppm formaldehyde can be used for protection of up to 10 ppm only.
