## **HOSE CLAMP REQUIREMENT FOR LOW PRESSURE HOSE USED ON SCBA CERTIFIED TO NFPA 1981-1987 OR 1992 EDITIONS**

The P/N 941873 low pressure hose is now used as replacement hose for all SCBA certified to NFPA 1981-1987 or 1992 editions. This low pressure hose is thicker than previous low pressure hoses. This 1.5 inch O.D. hose is marked with a U-notch or the letter "F" on one end.

Survivair requires that the hose clamp have a minimum of six (6) teeth engaged for this hose (P/N 941873). This is a change from Technical Bulletin #58 for ***this hose only***. Clamps must have a minimum of seven (7) teeth engaged for all other low pressure hoses.
